

Campervan For Sale

\$74,500

Mileage:
78,000

2021 Ram Promaster 2500
159" High Roof

Excellent
condition

With everything you need to explore in comfort, this custom-outfitted campervan was built in 2021 by the team at Off Grid Adventure Vans, the largest luxury van conversion company on the East Coast.

The kitchen includes an induction stove, fridge/freezer, and sink with filtered water.

The extendable memory foam bed is the van's most unique feature. When extended, the bed is larger than a queen size, which is among the largest beds you will find in a campervan. By day, the bed can be pushed in to reveal a dinette that comfortably seats 4.

A climate control heating system integrates with the van's fuel tank and can be left on all night without worry, keeping the van warm. Two ceiling fans let you control air circulation to your desire.
